OF THE

BELFAST MEDICAL LIBRARY

WITH THE

List of Members, Rules, &c.,

OF

THE BELFAST MEDICAL SOCIETY

1st OCTOBER, 1859.

BELFAST:

PRINTED AT "THE ADVERTISER" OFFICE,
WARING STREET.

1859.

The transcriber's intention was to produce a functionally exact copy of the 1859 Catalogue in the possession of the Ulster Medical Society. The result is not an exact replica but it closely resembles the original with some changes in the layout and pagination only in the introductory pages and indexes. No changes were made to the text except as noted below. The pdf file is completely searchable, and because no images are included, it is considerably smaller than a facsimile copy would be.

The volume must have belonged to the Library itself as there have been notes and corrections to the main list of books, and extra books have been recorded on the left-hand pages presumably kept blank for this purpose. Some of these books appear in the index but not in the main list, while others are dated after the Catalogue was printed. All manuscript entries with the exception of shelving notes and alterations to the Ethical Code and Rules have been transcribed, a *script font* being used to distinguish them. Scored out items have been ignored. There are a number of errors in the original printing (left uncorrected) and there will be new errors arising from the transcription.

The Ulster Medical Society would always be pleased to hear of any material relating to the Belfast Medical Society, the Belfast Clinical and Pathological Society and the Ulster Medical Society.

A Code of Medical Ethics

AS DRAWN UP AND ADOPTED BY

THE BELFAST MEDICAL SOCIETY.

~~~~~

### SECTION I.

DUTIES OF PHYSICIANS TO THEIR PATIENTS.

*A Physician should ever remember that the health and safety of his patients depend materially upon his assiduity and skill; and should also study to unite kindness with firmness, being courteous while exercising due authority.*

1.—Secrecy and delicacy, when required by peculiar circumstances, should be strictly observed; the obligation of the former extends beyond the period of professional services. None of the privacies of personal and domestic life—no infirmity of disposition or flaw of character, observed during professional attendance—should ever be divulged, except when such disclosure is imperatively required.

2.—All unnecessary visits are to be avoided—yet, the patient is not to be abandoned because the case is deemed incurable; and, while a Physician should not be forward to make gloomy prognostications, he must not esteem any case of too trivial importance; nor should he fail to embrace the opportunity which he not unfrequently enjoys, of promoting and strengthening the good resolutions of his patients.

### SECTION II.

DUTIES FOR THE SUPPORT OF PROFESSIONAL CHARACTER.

*There is no profession, from the Members of which greater purity of character and a higher standard of moral excellence are required, than the Medical; nor can any scientific attainments ever compensate for the want of correct moral principles. It is, therefore, incumbent on its Members that they should be*

1.—Temperate in all things—the practice of Physic requiring the unremitting exercise of a clear and vigorous understanding.

2.—Members should avoid, in the presence of non-professional persons, all remarks reflecting on the character of the profession, or those engaged in it.

3.—No Member should resort to public advertisements (except in case of removal), to the issuing of private cards or hand-bills, offering advice and medicine to the poor gratis, nor publish reports of cases or operations in the daily prints, nor suffer such to be made; he should not invite laymen to be present at operations, or boast of cures and remedies. Such is the ordinary practice of Empirics, and highly derogatory to the dignity of the profession.

4.—No Member should practice or countenance Homeopathy, Hydropathy, or Mesmerism.

5.—No Member should give testimonials in favour of any patent or proprietary medicines, or in any way recommend their public use.

6.—No Member should enter into compact with a Druggist or Apothecary to prescribe gratuitously, and, at the same time, share in the profits arising from the sale of the medicines.

SECTION III.  
DUTIES OF PHYSICIANS TO EACH OTHER.

*In cases of personal affliction, medical men are peculiarly dependent upon each other; and kind offices and professional aid should always be cheerfully afforded; therefore,*

1.—All Practitioners, with their wives and children, are entitled to the gratuitous services of any one or more of the faculty residing near them; if called to a distance, expenses should be paid.

2.—When, during sickness, affliction, or absence from home (not exceeding one month), one Practitioner has entrusted the care of his practice to a professional friend, the latter should not make any claim on the former, or the patient, for his services; but should, in all things, be the *locum tenens* of the absentee, save in cases of Midwifery, not previously arranged for.

3.—When a medical man has officiated for another, and the ordinary Practitioner has resumed his exclusive attendance upon the case, the former shall, on no pretext, make friendly calls upon the patient, without the consent of the ordinary medical attendant.

4.—A Physician, being a friend of the family, should avoid visiting, when aware that any member of the family is under the care of another medical man.

5.—When a Practitioner is called on an emergency, by a family usually attended by another, he should, when the emergency is provided for, meet the ordinary Practitioner, and after one consultation, resign the case into his hands; but is entitled to charge the family for his services.

6.—When a Practitioner is consulted by a patient whom he has previously attended, as the officiating friend of another, he should decline attendance, unless the patient has determined on changing his medical attendant; and, if so, he will be justified in taking charge—intimating, *in all cases*, the same to the former attendant.

7.—When a Practitioner is called to attend at an accouchement for another, he should in all cases, but the one provided for in Rule 2, Section III., be entitled to receive a fair proportion of the fee; and, when the delivery is completed, or on the arrival of the pre-engaged accoucheur, he should resign the further management of the case.

SECTION IV.  
DUTIES IN REGARD TO CONSULTATION.

*A Physician who is called upon to consult, should observe the most honourable and scrupulous regard for the character and standing of the Practitioner in attendance. No hints or insinuations are to be thrown out by the Consulting Physician; and he should also refrain from any extraordinary attention or assiduity, for the purpose of gaining applause, or ingratiating himself into the favour of families or individuals.*

1.—No Member should, on any pretext, meet in consultation persons practising medicine, who do not possess a legal qualification; nor can any one be considered a fit associate in consultation, whose practice is based on Homœopathy, Hydropathy, or Mesmerism.

2.—Where two Practitioners attend in consultation, and the period of meeting having been fixed, one of the two neglects punctuality—thus wasting the time of the other—the latter shall be expected to wait ten minutes, and may then visit the patient, provided a note or message be not sent.

3.—In consultations, the attending Physician should introduce the consultant, and, if necessary, be the first to examine the patient; and the ordinary attendant should communicate the directions agreed upon to the patient or his friends, as well as any opinions which it may be thought proper to express. No opinions or prognostications should be delivered, which are not the result of previous deliberation and concurrence; and, all discussions being held as confidential, neither by words or manner should any of the parties assert or insinuate that any part of the treatment pursued did not receive his assent; the responsibility must be equally divided, and the consultant should hold no conversation with the patient or his friends, with reference to the case, except in the presence of the usual attendant.

4.—When a Practitioner takes charge of a case for his friend, and it appears necessary to change the treatment, it should be done with the most scrupulous care, so as to avoid reflecting on the previous management.

5.—When a Practitioner is called to a patient already under the care of another medical man, he should not interfere, unless in case of decided emergency, but should request a consultation with the latter. Should a consultation be declined by the patient, the Practitioner last called in will be justified in taking charge of the case—a communication to that effect having been made to the former attendant.

6.—A consultant has no claim to be regarded as a regular attendant on the patient, and his attendance ceases after each consultation, unless otherwise arranged. The patient, therefore, or the Practitioner, is quite at liberty to call in another consultant, without the cognizance of the former, provided no appointment then exist; but in this, as in all other cases, remembering the position in which the consultant is placed, it becomes the duty of the ordinary attendant to see that the *honorarium* be not neglected.

SECTION V.  
ON THE ADJUDICATION OF DISPUTES.

*Whenever such cases unfortunately occur, and cannot be immediately terminated, they should be referred to the arbitration of the Council, which shall act as a COURT MEDICAL, with the distinct understanding that neither the subject-matter of such differences, nor the adjudication thereupon, shall be made public—as publicity in a case of this nature may be personally injurious to the parties concerned, and can hardly fail to bring discredit on the profession.*

R U L E S  
OF  
THE BELFAST MEDICAL SOCIETY.

Founded ———; Revived, 8th June, 1822.

~~~~~

RULE 1.—To afford its members increased facilities of consulting the best medical works and periodicals by means of the Library; of deriving mutual instruction on medical subjects, by means of its discussions and its Pathological Museum; and, as a collective body, protecting the interests of the medical profession. Objects.

2.—The Belfast Medical Society shall meet at their Library, on the first Monday of every month at seven o'clock, p.m. Five members to constitute a quorum. The President, or, in his absence, one of the Vice-Presidents, to take the chair. The Chairman shall have, in addition to his ordinary vote, a casting one in case of an equality. Passed, June, 1822; August, 1826; December 2, 1844; 1850. Meetings.

3.—The Society shall be specially summoned to meet on the first Monday in May, in each year, to elect a Treasurer and Secretary for the ensuing year.—September, 1826. A President and two Vice-Presidents, with a Council, consisting of six members, are elected annually, at same meeting, to superintend the affairs of the Library and Society.—October, 1850. Officers and Government.

4.—That every proposition for the enactment of any new law, or for the repeal or alteration of an old law, must be confirmed at the meeting subsequent to that at which it was passed, previous to its becoming a law of the Society.—November, 1824. Fundamental Law.

5.—The property of the Society shall not be disposed of for the benefit of the members, nor alienated from the use of the profession, without the unanimous consent of the Society, given at a special meeting summoned for that purpose, and called a month previously.—July, 1822. The Property of the Society.

6.—The Society shall be open to the admission of all members of the profession, including those resident in the country, on condition that the member proposing such shall hold himself responsible for their conforming in all respects to the rules of the Society.—June and July, 1822. Qualifications. Ordinary Members.

7.—That no member can ballot for a person proposed to be a member if he has not paid his annual subscription.—May, 1831.

8.—That, when any individual be in future proposed as a member of this Society, his legal qualifications to practice medicine, surgery, or pharmacy, shall either be produced to the Society, or the proposer or seconder declare that they have seen such documents.—May, 1833.

9.—The subscription shall be one guinea annually, payable in advance.—September, 1826. Subscription.

10.—That members joining the Society, between the months of May and November, shall be required to pay the full subscription of one guinea for the year unexpired; and that the sum of half-a-guinea be paid by all members admitted at or after November.—November, 1840.

11.—All persons who shall have continued members during twenty years, without intermission, shall be considered members during life, without further subscription; gentlemen in the Navy or Army, and other members who may have withdrawn from the Society, to be entitled to this privilege, after paying twenty years' subscription, although the payment thereof may have been interrupted by absence, provided that just cause be shewn for such absence.—October, 1850.

12.—Candidates for admission must be proposed and seconded at one regular meeting of the Society, and balloted for at the next, provided that the subscription for the current year be paid—one black bean in five to exclude. If excluded, the money to be returned.—December 7, 1846. Mode of Admission.

13.—No person who has been rejected, shall be proposed again within six months.—May, 1829. Rejected Candidates.

14.—Members who withhold the subscription one month after the meeting, in May, shall pay in addition a penalty of one shilling a month while it remains due.—September, 1826. Fines and Penalties.

15.—A member, whose subscription or fines remain due for one year, shall be considered as having withdrawn himself from the Society, and forfeited all his privileges and property therein, having been

noticed by the Secretary one month previously. Such persons shall be again eligible by ballot in the ordinary way, on having paid all arrears to the Society.—September, 1826.

Expulsion of
Members.

16.—Members conducting themselves in a disorderly or refractory manner, or disgracing, by immorality, the character of the profession, may be expelled. Any proposal for the expulsion of a member must be made at a regular monthly meeting, notice of which shall be immediately given by the Secretary to the party concerned, and the Society shall be specially summoned, to take it into consideration at the next regular meeting. No vote of expulsion can be carried into effect unless it be unanimous—the party concerned not being entitled to vote on the question.—September, 1826.

Honorary
Members.

17.—The Society may admit honorary members, on being proposed and seconded in the ordinary manner;—one black bean excluding.—May, 1825.

18.—Honorary Members shall enjoy all the privileges of the Society, except a share of the property, should a division of it take place, or a right of voting on the question of dissolution.—September, 1826.

Privileged
Visitors.

19.—That Surgeons in the Garrison, and Physicians in the Garrison, shall be admitted to consult and read books in the Medical Library; that the member introducing the visitor shall be considered accountable for his conduct while he enjoys this privilege; that the name of the visitor, with that of the member introducing him, be entered on the proposal book.—Dec., 1835.

20.—That any Veterinary Surgeon, possessing a regular diploma from any Veterinary College, on paying the usual subscription of one guinea per annum, may be allowed the use of the Library (but not the periodicals while circulating), after admission to such privilege, by ballot in the usual manner; but shall not be a member of the Medical Society, nor have any voice in its proceedings; he shall, however, be amenable to the laws of the Library.—June, 1841.

THE LIBRARY.

Proposal of
Books.

21.—Every work before admission, must be entered on the proposal book, and the price stated, fourteen days before the meeting at which it is to be proposed; and no book can be passed at any meeting unless the proposer or seconder be present.—April, 1841.

Circulation of
Volumes.

22.—No member resident in town shall have the use of more than one volume at a time, under a penalty of sixpence per day for each additional volume out of the Library.

23.—Members resident in the country shall be allowed two volumes at one time; penalty, if more than two be taken at the same time, the same as in Rule 22.

Circulation of
Periodicals.

24.—The periodical publications shall be circulated in rotation through the members in town, before they can be borrowed from the Library—Oct, 1839—and that the monthly and quarterly periodicals shall lie upon the Library table for at least one week before being circulated.—May, 1849.

25.—Members not wishing to receive the periodicals in course of circulation, may give notice thereof to the Secretary, which shall exonerate them from all responsibility and fines arising therefrom; and all members who are six months in arrear of fines, shall not be continued on the circulation until they be paid, due notice having been given before expunging their names.—June, 1829.

26.—Any member on the list may detain the book circulating during forty-eight hours; but if it be delayed longer, and not sent within that time to the next in succession, he shall pay a penalty of three pence per day for the first week, and, if detained longer, a penny for every additional day until the work be forwarded, Sunday to be excepted, and not reckoned as part of the forty-eight hours allowed; the member detaining the work on that day, to mark the word "Sunday" opposite to his name in the circulation sheet, otherwise he shall incur the fine.—October, 1839.

27.—If a member receive a book on circulation after the date marked on it as sent forward, he shall not pass it on without sending a written notice of the error to the member who has so dated it. Any member neglecting to do this shall be answerable for the fine.—February 7th, 1842.

28.—That all books shall be called in, immediately after the meeting of the Society in April, annually, by a circular letter issued to each member, giving at least ten days' notice previous to the day for sending them in. That any person neglecting to comply with this notice be fined five shillings.—December, 1829. Examination of
Library.

29.—That the Library shall be closed for one week in April, annually, and shall then be examined by a Committee of the Council, who are to report to the meeting in May on the state of the Library.—Dec., 1829; 1850.

30.—If any member should remove from the Library any work otherwise than through the Librarian, he shall be subject to a fine of ten shillings.—June 6th, 1842. Fines and
Penalties.

31.—Any member who detains a book longer than one month, shall be fined a penny a day until it be returned; but the loan of any work may be renewed at the expiry of the month, on making written application to the Librarian, provided the same work has not been applied for by any other member in the interim.—July, 1840.

32.—Any member who abuses or injures a book shall be bound to replace the work, or pay such fine as the Society shall think expedient to impose.—January, 1829.

33.—That a Librarian, at a salary, be appointed to take care of the books, and be responsible for the state of the Library, and also for irregularities in the entry of books on their return to the Library by members.—December, 1835, and August, 1837. Duties of
Librarian.

34.—That the Rules relating to the circulation and taking out of books be printed and pasted inside of the binding of each volume, that no member may, hereafter, plead ignorance thereof; and that no fine incurred by the violation of them shall henceforth be on any account omitted.—Feb., 1829.

35.—That he shall give attendance at the Library every day, excepting Sunday, between the hours of twelve and three, and six and seven o'clock, P.M. Country members, however, may obtain books at all hours when the Librarian may be on the spot.

36.—That he alone shall be responsible for the correct entry or marking out of all books received from or given out to members.

37.—That the Librarian place the periodicals on the Library table immediately on receiving them from the Secretary; and that he do not remove them until the end of the period enjoined by rule 24. He shall send out regularly every month, on circulation, such periodicals as may be received, in the manner directed by the Society.

38.—That he shall issue circulars to all members of the Society, requesting their attendance at the monthly meeting, and in these monthly circulars shall furnish to each member, reported to him by the Treasurer, the amount of fine due by him.

39.—That the keys of the Library shall be in his keeping, and he alone shall be responsible for the proper preservation and regulation of the books, and that he shall report monthly (previous to the meeting) to the Council such books as may be injured or mislaid.

40.—That he shall require each town member to bring to the Library any book he may have out before it can be renewed; and shall observe that every book FINALLY returned into the Library be not again issued until one full day shall have elapsed.

41.—That he shall summon a meeting of the Council every quarter, on the Thursday before the monthly meeting, for the purpose of examining the state of the Library, and reporting thereon to the regular meeting of the Society.

Privileges of
Librarian.

42.—That the Librarian be allowed the use of the Library, on condition that he enters regularly any books he may remove therefrom, in a page of the entry-book devoted to himself.—Sept., 1837.

43.—As the Medical Society believes that Homœopathy is founded in error—a delusion on the part of the practitioner, and a deception on the public—and, as it is one of the main objects of this Society to defend the interests of the public and Profession, it therefore cannot permit any person professing or practising Homœopathy to be, or continue, a Member of the Society. The same rule will be applied to any person practising exclusively Hydropathy, or any other system of Quackery.—July, 1858.

44.—That in future the qualifications of all Candidates proposed as Members of this Society be laid on the table previous to balloting—December, 1858—with the exception of those whose names appear in the Medical Register.—September, 1859.
